Aptem's Performance Dashboard

www.aptem.co.uk

Intro

Introducing Aptem's Performance Dashboard – Aptem's latest dashboard helps training providers, universities and colleges efficiently manage programme workloads and track the performance of tutors, teams, and the entire organisation.

Whether you are a Tutor or Coach, Operations Manager, or a member of the Senior Leadership Team, Aptem's Performance Dashboard is designed to provide you with the insights that you need to identify issues and optimise productivity.

For Tutors and Coaches, the Performance Dashboard helps you understand the health of your caseload, with each card looking at a different aspect of learner progress that requires your attention:

- ✓ Workload and progress scores indicate how your learners are progressing and how on top of your workload you are.

- ✓ Understand how your caseload is distributed across the different stages of learners' programmes, and quickly identify 'next steps' as they approach their End Point Assessment period with the Caseload Life Cycle card.

- ✓ View a breakdown of your learners' statuses with the Caseload Summary to see, for example, who is Onboarding, Ready to Enrol, Active, On a Break, or Entered EPA.

- ✓ Identify how many learners are behind, on track, or ahead, allowing you to focus your support where it is needed most with the Progress Overview and RAG Status Cards.

Progress Overview

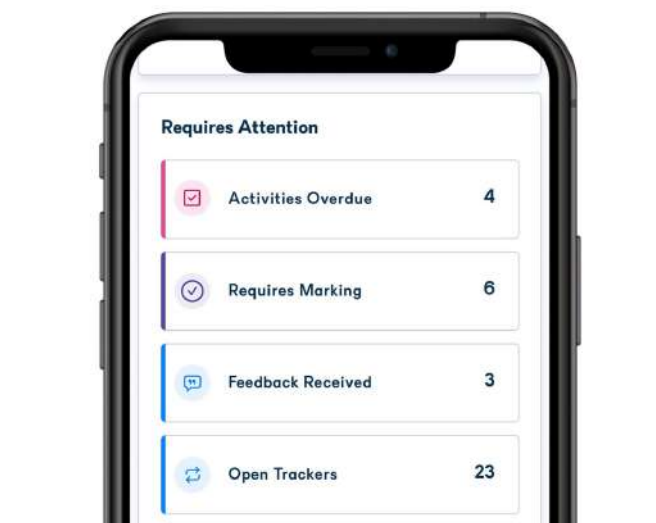

Behind	4
On Track	38
Ahead	34

RAG Status

Red	4
Amber	19
Green	24
No Status	29

- ✓ Focus your attention exactly where it is needed with the Requires Attention card. You can drill down into each item and view a list of learners attributed to each area of concern.

Operations Managers

It is not only Tutors and Coaches that have access to these powerful insights, Operations Managers also have a snapshot of how their team of tutors or coaches are performing, see how learner cohorts are progressing, and whether or not they're on track.

Senior Leadership Team

At the top level of your organisation, members of the Senior Leadership Team can filter the Performance Dashboard by Programme and Employer to see the health of learners on particular programmes, or under a specific employer – helping you quickly identify where support and improvements are needed.

Aptem's Performance Dashboard removes the guess work from your operations and uses data from your delivery to pinpoint where attention is needed, helping you optimise your programmes from onboarding to EPA.

“The Performance Dashboard will completely change the way that we are looking at our data and the way that our tutors are managing their caseloads.”

Natalie Doughty, Quality Manager at Learnmore Network
